

RahaDSL Notification: 18/03/2008

Dear RahaDSL Customer,

Updates and important information:

We are glad to inform you that we have now migrated completely on the new system. We thank you for your patience and understanding.

Also, we would like to request each and everyone of our users to change their current passwords and keep their passwords to themselves. If a client decides to disclose his password to any other party that will be at his/her discretion and his/her choice and raha.com shall not be held responsible. There are two places that a password change is needed;

1. PASSWORD CHANGE REQUIRED

Step 1: Please visit, <http://www.rahadsl.com> and on the top right hand corner of the page you have a front to login to your account and view status.

Step 2: Enter your user name and password and hit "GO".

Step 3: Select option **Personal** from the menu and change your password.

2. PASSWORD CHANGE REQUIRED ON YOUR ADSL MODEM

Step 1: From your browser (explorer or mozilla) go to 192.168.1.1

Step 2: Log on to your device with your DEVICE username and password (different from you RahaDSL username and password).

Step 3: See attached screen shot to change password. Make sure you **APPLY Changes** after retyping your password on the modem.

As we are about to enter into the easter holidays, we would like to remind everyone that our offices will be closed and should you need to purchase vouchers for your RahaDSL connection - you can do that tomorrow, Wednesday, 19th March 2008 and on Saturday, 22nd March 2008.

Happy Surfing!

Team RahaDSL
